

## HANEY TELLS MACLEOD FARMERS HOW IT'S DONE

CHOSEN FOR NINTH TERM WITH-  
OUT ANY OPPOSITION

Calgary, Jan. 21.—H. W. Wood this afternoon was elected unanimously by the United Farmers of Alberta to be their president for 1926. It will be his ninth consecutive year in the chair. No other name was proposed, and the 500 delegates received the election with much enthusiasm. Mr. Wood, in accepting the office, said he was much interested in the movement as ever he had been, and he believed the necessity for the U.F.A. as the primary farmers' organization, had not lessened with the organization of other branches.

"You all know the conditions under which you have made this nomination," said Mr. Wood, in referring to the nomination of himself, "and under which I can accept. I will do the very best I can," he added amid further applause.

"I am just as much interested in the success of the U.F.A. as I have ever been. I do not think the necessity of the primary organization has changed one particle. On the other hand I believe as these other organizations speed up (referring to the wheat pool and other co-operative marketing institutions) it increases the necessity of the continued development of strength and solidarity in the U.F.A. and to that end I will give my best effort."

Mrs. R. B. Gunn was elected by acclamation as president of the United Farm Women at a separate session today, for her second term.

The convention devoted the greater

IN THE MATTER OF THE ESTATE  
OF AUGUST BORGE, LATE OF  
THE TOWN OF MACLEOD, IN  
THE PROVINCE OF ALBERTA,  
DECEASED.

NOTICE is hereby given that all persons having claims upon the estate of the above named August Borge, who died on or about the 28th day of July 1923 are required to file with the undersigned by the 7th of March A.D. 1925, a full statement duly verified of their claims and of any securities held by them, and that after that date the executor will distribute the assets of the deceased among the parties entitled thereto having regard only to the claims of which notice has been so filed or which have been brought to their knowledge.

Dated this 19th day of January A.D. 1925.

John L. Fawcett,  
Executor,  
Macleod, Alberta.

IN THE MATTER OF THE ESTATE  
OF CHARLES H. MILLER, DE-  
CEASED LATE OF THE TOWN  
OF MACLEOD, IN THE PROV-  
INCE OF ALBERTA

NOTICE is hereby given that all persons having claims upon the estate of the above named Charles H. Miller, who died on or about the First day of March 1924, are required to file with the undersigned by the 7th of March A.D. 1925 a full statement duly verified of their claims and of any securities held by them, and that after that date the executor will distribute the assets of the deceased among the parties entitled thereto having regard only to the claims of which notice has been so filed or which have been brought to their knowledge.

Dated this 20th day of January A.D. 1925.

John L. Fawcett,  
Solicitor for the Executors,  
Macleod, Alberta.

part of the morning to resolutions, and adopted a motion asking the provincial government to take over the administration of school districts where serious depopulation had taken place.

Calgary, Jan. 21.—A total of 487 delegates had registered when the annual convention of the United Farmers of Alberta was resumed this morning. Discussion of resolutions continued.

There was a lengthy debate on a proposal that the railway companies be asked to install safety gates at level crossings "all over Canada," after which the resolution was defeated. Speakers declared the request was unreasonable and that the cost ultimately would fall on the general public. An amendment which proposed safety gates for crossing where traffic was heavy or used by school vans also was defeated.

A motion urging the Canadian National Railway to go ahead with railway construction from Calgary south to Macleod was referred to the new board.

Early completion of the Hudson Bay Railway was demanded by recommendation adopted almost unanimously. There was some objection by strenuous advocates of the Pacific grain route.

The convention will consider later a lengthy recommendation which has come from a special committee and which seeks to interpret the situation politically to the association and its members in parliament and the legislature.

The recommendation declares that an elected member nominated by the U.F.A. organization in any constituency, shall be expected to attach himself to no other legislative group or party; that each U.F.A. member is responsible directly to his own U.F.A. constituency organization and that organization is responsible to the U.F.A. organization as a whole. Each member is expected to co-operate as an individual with all other U.F.A. members "thereby forming and organizing a parliamentary group unit," and this unit is to co-operate as such with other parties, groups or individuals "where practicable to do so in the interests of desirable legislation."

The fullest constituency autonomy in nominating and electing a candidate is conceded.

It is made plain that the U.F.A. parliamentary group shall be entitled to act with individual members when a majority of the U.F.A. group so decided. U.F.A. legislative members also are given authority to co-operate with legislative groups from other provinces elected by bonafide farm organizations.

Principles and policies of the U.F.A. convention are to be the "general guiding influence" of U.F.A. members.

Debate on this recommendation

DOMESTIC ANIMALS ACT  
(MUNICIPALITIES)  
NOTICES OF SALE

Notice is hereby given under Section 48 of The Domestic Animals Act (Municipalities) that the following animals have been impounded and sold, and may be redeemed by the owners or on their behalf within a period of thirty days from the publication of this notice in The Alberta Gazette of the 15th of January, 1925, upon payment of all fees and costs due to the municipality and purchasers of the said animals:

One black two-year-old filly, no brand visible, sold to W. Porch, of Macleod;

One grey gelding, branded FX on right thigh, sold to F. Presley, of Macleod;

One black gelding, branded VC on right shoulder, sold to R. L. Hackett, of Macleod;

One team of bay geldings, no brand visible, sold to J. Storey, of Macleod;

One sorrel mare, branded 23 over half circle points down over 7 anchor on right thigh;

One bay gelding, indistinct brand, left shoulder, sold to Orrin Lockard, of Macleod, were impounded in the pound kept by H. W. Tomlinson, located on the S.E. 1/4 2-8-26-W4, on the 11th day of December, 1924, and the said animals were sold on the 24th day of December, 1924.

For information apply to Harry W. Bright, Secretary-Treasurer, Municipal District of Bright No. 69, Macleod, Alberta.

promises to be the feature of the convention and important changes may be made in it.

Calgary, Alta. Jan. 21.—The United Farmers of Alberta on Wednesday afternoon went on record approving the principle of practically every form of co-operative marketing. This question was debated at great length, indeed the whole of the afternoon session was devoted to the consideration of voluminous reports presented by the marketing committee of the organization.

After hearing the reports the convention went on record in favor of co-operative marketing of the products as outlined. A resolution urged the various provisional boards to bring the pools into operation as soon as possible and pledged the membership to secure sufficient contracts to ensure the success of the various enterprises.

The convention also adopted the principle that the U.F.A. is primarily responsible for the formation of the various pools in the province. In view of this fact a resolution was adopted that as the U.F.A. was put to considerable expense in connection with the initial work of organizing the pools that members of the U.F.A. should pay some part for the costs. There was, however, no intimation as to the method of making this collection.

W. H. J. Tiedale, assistant manager of the Canadian Co-operative Wool Growers Association, produced figures to show that farmers who sold their wool through the co-operative association received better prices than those who sold through the open market in six out of the last eight years. From 1917 to 1919 the difference was as high as 25 cents a pound.

W. F. Stephens, secretary of the livestock pool, read a report outlining the steps that had been so far taken in organizing the pool and gave an exhaustive history of the livestock industry in Alberta.

Asked what volume of business would be required before the pool could start business, Mr. Stephens replied that 2,500 cars had been set as the absolute minimum. It was felt that the pool should start business with that amount rather than to let the scheme drop altogether and he believed that a minimum was justified.

The report of the dairy pool presented by Nelson Smith, of Olds, was equally as exhaustive as the other, outlining in detail steps taken so far. There were numerous questions and the report was finally adopted after a delegate had told the convention that it was up to every producer of this product to sign a contract and get behind the pool. They were the ones that were going to make the pool a success or a failure. It was only natural, he said, that the provisional board would not know exactly what would be done until after the contracts were signed and the permanent board of directors selected.

Calgary, Jan. 23.—A recommendation that the Alberta government cancel its grants of \$50,000 each to the agricultural fairs of Calgary and Edmonton unless games of chance at those fairs are eliminated was adopted by the United Farmers of Alberta this morning.

At the same time the government was asked to enforce the laws against games of chance at all fairs and to enact new legislation if necessary.

There was severe criticism of this class of attraction, which was termed a corrupting influence in provincial life. On the other hand other delegates saw little harm in these games of chance and declared a man should be permitted some latitude in the spending of his money.

The resolution asks that "drastic and exemplary" punishment be administered to anyone engaging in such games.

Declaring that Alberta's relation to Eastern Canadian finance and manufacturing was "that of the absentee proprietor," the delegates urged the closest possible co-operation between that province and British Columbia, to develop the western outlet for lower freight rates and to bring in manufacturers.

Calgary, Jan. 23.—Adoption of a resolution clearly outlining a declaration of principle for the United Farmers of Alberta, which closely linked up the federal and provincial constituency association, formerly known as political associations, with the organization as a whole, featured the Friday afternoon session of the annual convention here. At the same

South Alberta attendance at the Haney series of meetings went over the 2000 mark at Macleod Saturday when some 2000 crowded into the Town Hall to hear the man from Dakota who has been preaching the new gospel of safe farming for the past 10 days. Macleod people, who have earned the reputation of doing things right, got behind the Haney meeting here, and judging by the pleased comments heard after the gathering, they felt they had done the right thing once more. People were present from Claresholm, Brocket and Monarch. It was a real farmers' gathering, and the Board of Trade, Fair Board, U.F.A. officials and others who had co-operated in the organization were more than satisfied.

"Finest lecture I ever heard," said one man.

"Most interesting hour I ever spent," said another.

He has the real dope; just talked to us like one farmer to another," said a third.

"He gave us a new lease on life."

These and many similar remarks were made to the Times after the meeting.

M.L.A. Boosts Rotation

Strong support of the Haney rotation, including corn and sweet clover, was given by W. H. Shield, M.L.A., in a brief but stirring speech at the close of the meeting when he declared there should be organized without delay a community organization to devote itself solely to the problems of the farmer in his effort to put the new kind of farming into practice.

"Let us get out of the rut of wheat growing and build up this district to be what we know it can be made to be," he said.

A. D. Ferguson, the new president of the Board of Trade acted as chairman for the early part of the meeting, and Hugh McIntosh, vice-president, acted in a similar capacity for the latter part. Mr. Ferguson in a neat speech introducing Mr. Haney, said that the main object of the Macleod Board of Trade was to co-operate in solving the farmers' problems so that the whole community might be prosperous. Good audiences had greeted Mr. Haney wherever he had spoken, and Macleod was no exception. Mr. Haney had been brought in; he was a farmer of training and experience, who seemed to have an understanding of the farmer's problems, and no organization was more intensely interested in their solution than the Macleod Board of Trade.

Real Interest Shown

By way of introduction, Mr. Haney, superintendent of I. H. C. demonstration farms, said that it was evident the people of Southern Alberta were thinking farm diversification. The attendance at Macleod and at all other points where the meetings had been held was evidence of it. Some people, he had learned, had been dabbling in corn and sweet clover, but he believed that new interest had been aroused which would make the place of these crops on the average farm just as important as that now held by wheat.

"We have had an attendance of over 2000 people at the meetings held to date on this tour. That shows you are thinking of these things. The thing to do now is to apply them to your own farms," said Mr. Haney.

Dealing with hard times and the tendency of people to move around he said there was no good in chasing around all over the country trying to find a better place. There is too much waste in that. The thing to do is to settle down, tackle the problem and make good.

Nature's Perfect Rotation

Little can be done on the farm without a rotation, he declared. Nature has a "perfect rotation." Take a square yard of the old range as the white man found it. On that would be found deep rooted plants

and shallow rooted plants, legumes that take nitrogen from the air and store it in the roots—a perfect rotation. "And we plow that up and expect it to grow nothing but wheat. It can't be done," said the speaker.

He said he had found a tendency among the farmers on this side of the line to kick because of the tariff against cattle entering the United States. But on the other side he found the same tendency to kick because of the tariff which prevented them from coming to Canada to buy stock and feeder cattle. But if we grow the feed on our own farms and feed it there to our cattle we can make just as much money here as they can in the U. S. and Mr. Haney cited actual feeding results at Hamilton, Man., and Aberdeen, S.D., in support of his case.

Irrigation and Dairying

Turning to irrigation for a moment he said he had heard since coming to Southern Alberta that irrigated land was too expensive for dairying. Why, the most expensive land in the world, the Jersey Islands, where land is worth \$1,000 an acre, is used almost solely for dairying. Irrigation and hogs, and irrigation and sheep, the proper rotation to grow feed, made a perfect combination, and he told of what was being done on the Valler project in Montana to secure farm flocks for the irrigation farmers there.

"The hens and cows should at least buy the clothing and groceries for the family, and the hogs should pay the taxes," said Mr. Haney. "Then the farmer could attack the problem of making the farm pay with some assurance of success."

Mr. Haney seems to be getting better and better as the Alberta meetings go along. He is getting more local examples of the success farmers here have made with corn, sweet clover, dairy cows and hogs, and he is making greater local application of the rotation he is urging. He declared here that the best experiment station in any crop was the successful farmer, who is carrying on a crop rotation that is making him a profit and maintaining the fertility of his soil. He urged that farmers should study the methods of their successful neighbors, put them into practice and help restore once more confidence in their community. Corn would aid in this, he was quoted, were doing to bring back worn-out wheat lands, and said such a plan should be followed here. The separate organization, tackling the problem and getting the interest and co-operation of all the farmers would achieve results much earlier than the individual farmer trying to work out all problems all by himself. He thanked Mr. Haney personally for the help he had received from the address.

Following in an appeal for a community organization at Macleod to give effect to the solution proposed by Mr. Haney, W. H. Shield, M.L.A., said he believed the district right around Macleod, while not so good for wheat raising as other parts farther south and west, could be made prosperous and permanent. He urged farmers to get more sheep, of which there are far too few in Canada, to grow sweet clover and corn for feed, and to practice more dairying. He said he had been following the results of Mr. Haney's work in the Dakotas for some years and had absolute confidence in what that speaker had advocated that afternoon. He also told of what community organizations in Southern Manitoba, in districts in which he was acquainted, were doing to bring back worn-out wheat lands, and said such a plan should be followed here. The separate organization, tackling the problem and getting the interest and co-operation of all the farmers would achieve results much earlier than the individual farmer trying to work out all problems all by himself. He thanked Mr. Haney personally for the help he had received from the address.

More Sheep Urged

Mr. Haney seems to be getting better and better as the Alberta meetings go along. He is getting more local examples of the success farmers here have made with corn, sweet clover, dairy cows and hogs, and he is making greater local application of the rotation he is urging. He declared here that the best experiment station in any crop was the successful farmer, who is carrying on a crop rotation that is making him a profit and maintaining the fertility of his soil. He urged that farmers should study the methods of their successful neighbors, put them into practice and help restore once more confidence in their community. Corn would aid in this, he was quoted, were doing to bring back worn-out wheat lands, and said such a plan should be followed here. The separate organization, tackling the problem and getting the interest and co-operation of all the farmers would achieve results much earlier than the individual farmer trying to work out all problems all by himself. He thanked Mr. Haney personally for the help he had received from the address.

More Sheep Urged

Following in an appeal for a community organization at Macleod to give effect to the solution proposed by Mr. Haney, W. H. Shield, M.L.A., said he believed the district right around Macleod, while not so good for wheat raising as other parts farther south and west, could be made prosperous and permanent. He urged farmers to get more sheep, of which there are far too few in Canada, to grow sweet clover and corn for feed, and to practice more dairying. He said he had been following the results of Mr. Haney's work in the Dakotas for some years and had absolute confidence in what that speaker had advocated that afternoon. He also told of what community organizations in Southern Manitoba, in districts in which he was acquainted, were doing to bring back worn-out wheat lands, and said such a plan should be followed here. The separate organization, tackling the problem and getting the interest and co-operation of all the farmers would achieve results much earlier than the individual farmer trying to work out

**AMBASSADOR OF EMPIRE**

"What is the biggest single factor in international politics today?" asked Viscount Cecil when he visited Washington recently.

Lord Cecil says it is the League of Nations.

The League is an important factor. But the one big hope of world peace, the one outstanding guarantee of civilization, is the friendship that exists between United States and Canada, and through Canada, with the British Empire.

The safety, hope and salvation of the world are finally dependent upon the unification of the English-speaking peoples. And Canada is contributing materially to that unification.

The British Empire has 400,000,000 souls. Of these, 100,000,000, or 25 per cent, are Nordic. United States has 125,000,000 people, 105,000,000 of which are whites.

Those two white populations combined animated with a common ideal of peaceful progress, can establish a civilization that will guarantee peace and prosperity to the world for a thousand years.

In wealth, which is always power, these two entities control the earth.

The real basis of friendship between United States and the Empire is not speech-making in Washington or London, not spectacular exhibitions of royalty nor any amount of tactful diplomacy, but just the plain goodwill between two good neighbors who gossip over the back fence and understand each other in a neighborly tolerant way.

Canada's value to the Empire depends entirely upon the strength of character, the nationalism with which she can impress her personality upon the United States of America.

**MAKING WOMEN "FREE"**

Mrs. Helena Normanton, England's famous woman barrister, talks glibly in New York about "setting women free."

She says that women in business can do more for the emancipation of their sex than women in politics.

More utter nonsense has been talked about the "emancipation of women" than about almost anything else in the world.

You can't "set women free" because they are free already. They have been free since the beginning of time.

The right to vote, the right to hold office, the right to get drunk and smoke cigarettes in public—these things do not constitute freedom.

Real freedom is simply power. The person with the most influence to make things happen as she wishes is the one with the most freedom.

How many women on this continent don't rule their households and their families? About 90 per cent. do. And the other 10 per cent. could if they wanted to.

That doesn't mean that 90 per cent. of all husbands are hesepoked. It

**DRINKING SONG**

Come! fill a fresh bumper, for why should we go  
While the nectar still reddens our  
cups as they flow?

Pour out the rich juices still bright  
with the sun,  
Till o'er the brimmed crystal the rubies  
shall run.

The purple globed clusters their life-  
dews have shed;  
How sweet is the breath of the frag-  
rances they shed!

For summer's last roses lie hid in the  
wines  
That were garnered by maidens who  
laughed thro' the vines.

Then a smile and a gleam, and a toast,  
and a clasp,  
For all the good wine, and we've some  
of it here!

In cellar, in pantry, in attic, in hall,  
Long live the gay current that  
laughs for us all!

—Oliver Wendell Holmes.

simply means that women know how to run their husbands and make them like it—and at the same time make the husbands think that the lovely male is the king of the household. Women like Mrs. Normanton are not really looking for more freedom. They are simply looking for other worlds to conquer.

**CROSSWORD PUZZLES**

Five thousand crossword puzzles, in Spanish, go to South America in one shipment from New York. The craze has caught the fancy of Brazilians and others down there below the equator. England and other countries also trail the enthusiasm for the brain exercisers.

That is what they are—brain trainers. Which is more than can be said of many other games that are simply the last resorts of idle minds.

**HOMEMAKERS' CORNER**  
(Conducted by Miss Alice L. Webb, State College of Washington.)

**Scottish Fancies**

The best day in all the year for the Scotch is Jan. 25, for that is the birthday of their Bobbie Burns. In his memory, at this time of the month, many a table bears dishes known in the Highlands and Lowlands of Bonnie Scotland. Among them one of the daintiest is called Scottish Fancies.

To make these, beat an egg till light, add gradually half a cup of sugar and then stir in 2-3 tablespoon of melted butter, a cup of rolled oats, a third of a teaspoon of salt, and a fourth teaspoon of vanilla. Drop the mixture a teaspoonful at a time half an inch apart on a greased sheet of tin, spread circular with a fork dipped in cold water, and bake in a moderate oven till delicately browned. To give variety one may use only 2-3 cup rolled oats, filling the cup the rest of the way with shredded cocoanut.

**Scotch Broth**

A wholesome and nourishing dish in Scotch Broth. Cut 3 lbs. of mutton off the fore-quarter and wipe it, then cut the lean meat into inch cubes and cover with 3 pints of cold water in a kettle. Bring it to a boil quickly and skim, then add 1/2 cup barley which has been soaked over night in cold water. Simmer until meat is tender—1 1/2 hours should do. Put the bones in another kettle, cover with cold water and boil slowly to boiling, skin and boil 1 1/2 hours. Then strain the water from the bones and add it to the meat. Fry 5 mins. in 2 table-spoons of butter, a quarter cup each of carrots, turnip, onion and celery cut in 1/2 inch dice. Add to the meat soup, salt and pepper to taste, and cook until the vegetables are soft. Thicken with 2 table-spoons each of butter and flour cooked together. Add 1/4 table-spoon finely chopped parsley just before serving. Rice may be substituted for the barley if desired.

Scotch Five O'clock Tea  
Scotland is famous for her short-

bread. Here is a rich recipe. Cream 1/2 lb. butter and add gradually 6 ozs. powdered sugar while beating constantly. Then with the hands work in a pound of bread flour. Press it into a buttered dripping pan till evenly spread 1/4 inch thick over the bottom. Prick at even, frequent intervals with a fork and bake in a moderate oven 35 mins. When cooled slightly, cut into squares or oblongs and remove from the pan.

Scotch Woodcock  
Naturally you think you are going to have a fine bird of some sort when you get a Scotch Woodcock. But you don't. That's Scotch humor. You get instead an egg dish—a very toothsome one, however. This is the "how":  
Make a thin white sauce of 3 table-spoons of butter, 1 1/2 table-spoons of flour, a cup of milk, 1/4 teaspoon of salt, a few grains of cayenne, then add 4 hard-boiled eggs chopped fine, and season with Anchovy sauce. It is served on buttered toast. One may substitute asparagus tips for the Anchovy sauce if desired.

**Additional Locals**

Nominations for Town Council Monday, February 2nd.

J. W. McDonald, K.C., was a business visitor to Calgary last week.

Mr. and Mrs. D. J. Grier were visitors to Calgary for a few days last week.

The ladies of Macleod Hospital Aid are to be congratulated on the success of their card party, social and dance Wednesday evening in the I.O.O.F. Hall. The ladies' first prize at cards was won by Mrs. W. J. Ryan—consolation by Mrs. Jos. Davis; gentleman's first by H. Benson, consolation by Wm. Charlton.

The old-time painter, wiping his hands on his blouse, little knew that he was creating a futurist masterpiece.

KITCHEN MANAGEMENT**

To Every User of

**MAPLE LEAF FLOUR**  
FOR BREAD, CAKE & PASTRY

In addition to the excellent baking results which Maple Leaf Flour always guarantees, you can now secure in every bag a coupon to apply on the valuable Free Course on Cookery Arts and Kitchen Management which contains all the essentials of a college course in Domestic Science.

This course is so thorough and practical that it requires little or no explanation outside of the lessons which are mailed to you each month. But it is so original it will set you thinking and you will undoubtedly decide to ask Anna Lee Scott to help you with actual problems which arise in connection with household manage-

ment or in preparation of special dishes for special occasions.

You Can Ask Anna Lee Scott any time during the five months you are taking the course for advice about any special recipes you may want—about any cooking problem—about the conduct of any social affair—about any inquiry pertaining to the preparation and serving of food for any occasion will be answered personally by Anna Lee Scott without charge.

Think what a wonderful service this will be. It is absolutely free to every woman who sends in the four coupons entitling her to membership in the Maple Leaf Club.

**HOW TO JOIN THE MAPLE LEAF CLUB  
and Enroll for this Valuable Course.**

Coupons will be found enclosed in every bag of MAPLE LEAF FLOUR.  
(24 lb. bag—1 coupon; 40 lb. bag—2 coupons; 55 lb. bag—4 coupons.)

Send only four coupons addressed to the Maple Leaf Club, Maple Leaf Milling Co., Limited, Winnipeg, Manitoba, and you will be enrolled without one cent of expense as a member of the Maple Leaf Club and receive the first four lessons in the course. Other lessons will be sent in four monthly installments—4 lessons each month. (20 lessons altogether.)

You pay no money for this course. All lessons are sent postpaid. You study lessons when and how you choose. No money to be paid. No examinations or correspondence required. You may write in for advice, however, and Anna Lee Scott will gladly answer inquiries regarding any household problem.

## CAPITAL GOSSIP AND PROV. NEWS

**Fine Gift for Municipal Hospital**  
A unique and much appreciated service for the municipal hospital at Red Deer was performed recently, by the Rotary Club of that city, when the club installed a radio set for the hospital, wiring the whole building and providing ear-sets for each patient's bed in the hospital.

**Alberta Fish for Chicago**  
A carload of fresh Alberta fish was shipped from a point on the A. and C.W. the past week to a firm in Chicago, opening up a new market for this Alberta product.

**Fox Farms**  
Fox farming in Alberta is on the increase. A new fox farm has just been established at Bassano, Alberta.

**Get Some of Surplus Money**  
Alberta is to receive a share of the surplus money lying in trust with the Dominion Government from the operations of the wheat board. The total for distribution among the provinces is stated to be \$560,000, of which Alberta will receive about 20 per cent. according to an Ottawa dispatch.

**Expect Increased Production**  
"Twenty-five for '25", is the slogan of the Alberta Dairymen's Convention which is to be held in Calgary, February 4, 5 and 6. The slogan voices the anticipation of the dairymen for a production of 25,000,000 lbs. of creamery butter in 1925. The production in 1924 was 21,500,000 lbs.

**Winners at Seed Fair**  
Nick Taltenger of Claresholm, won the grand championship for wheat at the Provincial Seed Fair held in Calgary the past week. Major Strange, world champion wheat grower of 1923, was a close competitor with Mr. Taltenger, and won first in wheat in

## Rathwell

Friends of Mr. and Mrs. William Rathwell, to the number of about thirty, paid them a visit on Monday evening of this week. The early part of the evening was pleasantly spent in playing Court Whist, the Ladies' prize being won by Miss A. Foster, the Gentlemen's prize being captured by Mr. C. Leighton. The Ladies' booby prize went to Miss Vada Leighton, while the Gents' booby prize went to Walter Clarke. Refreshments were served, after which dancing was indulged in, the music being furnished by Messrs. Gemill and Don White, violin, and Tommy Clarke, saxophone. The guests united in declaring this the social event of the season.

We are sorry to learn that two of our rancher friends have been seriously indisposed for the past two weeks, Jesse Johnson suffering from sciatica while W. D. Danforth has been pleuro-neuralgia. Both gentlemen are now on the mend and we hope for their speedy recovery.

Thomas Clarke, sr., who represented the Rathwell local at the U. F. A. Convention held in Calgary last week, returned home on Saturday last. He reports a most enthusiastic meeting with much important legislation being transacted. The Convention was attended by about 500 delegates they coming from every corner of the province.

Mrs. George Leighton attended the U. F. W. A. Convention held in Calgary last week, returning home on Friday evening.

Several of our people are suffering from severe colds, but are slowly recovering.

Mr. William Shield, member of the legislature, was in Calgary during the U. F. A. Convention, watching with great interest the course of the business as carried on during the whole of the entire week. He returned to Macleod Friday evening.

At the regular meeting of Mountain View Lodge No. 4, I.O.O.F., held on Thursday evening last, Thomas Clarke was elected a delegate to attend the Alberta Grand Lodge which meets in Medicine Hat on the 19th of February.

Dance at the school house on Friday evening of this week.

MACLEOD REBEKAHS INSTAL NEW OFFICERS

During last week the Rebekahs of Macleod I.O.O.F. held their regular election and installation of officers for the term when Bro. E. F. Brown and Sister Lechead installed the new officers with due solemnity. This order is growing in numbers and is becoming a strong lodge in Macleod and district from which many of the members come.

At the close of the ceremonies, a banquet was served to the new officers and the members present, when a pleasant hour was spent in getting acquainted with each other and with the order.

The officers installed were: J.P.G., Mrs. Mottley; N.G., Mrs. Sutherland; V.G., Miss Atkinson; R.S., Miss Thewlis; F.S., Mrs. Shield; treasurer, Miss McHattie; warden, Ruth Gillespie; conductor, E. Gillespie; organist, Miss Laycock; R.S.N.G., Sister Wilson; L.S.N.G., Mrs. Perkins; R.S.V.G., Sister Fleming; L.S.V.G., Sister Dickson; I.G., Sister Coffey; O.G., Sister Pollard; chaplain, Sister Lechead; representative to grand lodge, Sister Pollard.

America is learning much of culture, but is yet unable to enthuse over an artist whose name can be pronounced.

his song, but failed to win the grand championship. Carl Scheets of Shepard was grand championship winner in oats. J. W. Lucas secured the championship for barley. Brooks agricultural society took the shield for best display with Bowden and High River following.

The fair was a considerable success, and largely attended. The complete list of prize winners is not yet available. A splendid exhibit of corn was made, entries from Purple Springs, Brooks and Empress being heavy winners in these classes.

**Irrigation Course**  
Great interest is being shown in the special practical course in irrigation farming which is to be given at the experimental farm, Lethbridge, commencing February 2 and lasting one week. Lectures will be given by well known authorities and demonstrations held.

**Bar Liquor from Banquets**  
A new regulation prohibiting the use of spirits or hard liquor at Banquets in the province has just been passed by the Liquor Control Board. Beer and wine will be permitted under permit.

**Vaccine for Tuberculosis**  
Still another step in the campaign of the provincial department of agriculture to bring to bear every possible factor on the fight to eradicate tuberculosis from cattle, was taken this week when Hon. Geo. Hoadley cabled to England for a supply of the vaccine developed by Dr. Nathan Raw.

Notice of Dr. Raw's discovery was brought to Mr. Hoadley's attention in a letter from the office of the high commissioner for Canada in London, England. Mr. Hoadley immediately cabled for a supply of the vaccine. The vaccine is the development of Dr. Nathan Raw, late member in the British House for Liverpool and former visiting physician to the Hea-wall consumption sanatorium. In an article enclosed in the letter from the high commissioner's office and taken from an English newspaper it is stated that the vaccine has had a test of over three years and has been successful in all cases. One prominent veterinary found that on one breeder's farm where 50 per cent. of the calves had suffered from tuberculosis prior to the introduction of the vaccine, not one calf showed symptoms after its introduction.

The treatment with the vaccine is simple. Immediately after birth the calf is separated from its mother to avoid infection. When a week old it is vaccinated and two weeks later is again vaccinated, against tuberculosis.

## REACH & COMPANY, LTD.

DRY GOODS, BOOTS & SHOES, CLOTHING, ETC., GROCERIES, EVAPORATED AND FRESH FRUITS

A society page item says—"Skirts will be shorter"—this means a demand for the latest in hosiery. We are still agents for the Hole Proof Hose. The latest is from the Mercury Manufacturing Co. Mercerized silk and wool, and heavy, pure silk. Silver grey and light fawn with a delicate stripe running down, showing a background of a delicate plaid tracery. In the movement of the leg it has a pleasing effect of all the shades merging in one harmonious whole.

During stock taking all odd sizes and colors of stockings will be sold a little over cost.

Riders of the Plains, Cowboys and Broncho Busters will want a pair of Riding Congress—We are clearing them out at \$6.50.

Sweater Coats for Men, Women and Children will be sold at cost, as we want to buy a new stock for another year.

The beauty of buying Boys' and Misses' Skating Balmorals at cost is, if there is no skating later on these can be worn as an ordinary boot at half the price.

Youths' and Misses' Felt Boots—a few left—at ridiculous prices.

Men's Leather Lined Vests at Cost.

Men's Overcoats from \$5.00 upwards.
